

Collins Aerospace

ACE Site Lead - Banbury

Collins Aerospace is a leader in technologically advanced and intelligent solutions for the global aerospace and defence industry. Created in 2018 by bringing together Rockwell Collins and UTC Aerospace Systems, Collins Aerospace has the capabilities, comprehensive portfolio and expertise to solve customers' toughest challenges and to meet the demands of a rapidly evolving global market.

The high quality products we design, test and produce in our Mechanical Systems help millions of passengers reach their destinations safely – every day! From landing systems and actuation to propellers, flight controls and hoist and winch – the products we manufacture work together behind the scenes to enhance the overall flight experience. We delight our customers with superior products and best-in-class service. Our global team is committed to continuous improvement – we work hard to make our solutions lighter-weight, stronger and more technically advanced, so that plane travel can be safer, more affordable and more sustainable in the years to come. We are looking for the best and brightest to fly and land with us!

Collins Aerospace makes modern flight possible. Of course, that wouldn't be possible without the capabilities and technologies of our organization, as well as our engineers – a highly skilled, accomplished network that spans more than 180 sites, 24 countries and 6 Strategic Business Units (SBUs).

Our industry-leading experts are setting the standards for the aerospace industry and paving the way for the future. But as new challenges present themselves, we need fresh, creative and motivated minds to overcome these hurdles, help us break barriers and achieve new levels of innovation. Do you have what it takes to join a global, diverse organization that doesn't shy away from big opportunities? If so, we invite you to join our ranks and create the next generation of aerospace technologies.

Together, we will nurture an engineering culture that values intellectual curiosity, risk takers and integrity. A place where we will challenge ourselves, our teams, and the status quo and where we will work to find a way – the right way – to achieve what others can only dream of. Working for our Banbury site, the ACE and Support Site Lead will drive business improvement across all functions as well as providing a senior focal point for key Business support functions. The post is one within the Senior Leadership Team and will be required to contribute to the overall business strategy and operate in a wide range of business initiatives and activities.

As ACE and Support Site Lead, you will

- Plan, communicate and drive the ACE progression for the Site to achieve ACE Gold
- Undertake specific improvement activity to support functional areas to achieve operational excellence
- Provide technical know-how to lead and support improvement events to improve specific areas in line with business priorities.

- Provide an on-site focal point of escalation for functional areas including Quality, Supply Chain, Digital Systems, EH&S, Facilities and Maintenance.
- Support the Functional leads in these areas to drive strategy and improvement activities to meet or exceed the business requirements.
- Provide impartial guidance to the management team to ensure that annual Policy Deployment objectives are met including leading the governance activity to maintain focus.

You will bring to the role:

- Excellent leadership communication skills at all business levels
- A degree education or equivalent
- Experience of managing and providing technical and professional leadership, ideally in a multi-functional matrix based organisation
- Understanding of lean manufacturing systems, production flow lines and the elimination of waste in business and Operational processes.
- Demonstrable track record of delivering KPI improvement, working either independently or as part of a multifunctional team
- Experienced in providing regular (daily/weekly/monthly/quarterly) reports to MD/wider business
- Knowledge of Lean principles and quality problem solving tools
- Results driven approach and an enabler for change
- Excellent time management and organisation skills
- A flexible approach to working to ensure that deliverables are met within the defined timescale

Desirable:

- Experience of composite material manufacture
- SAP experience/awareness
- Experience of managing a Functional based team, preferably in Quality, Supply Chain or Business Improvements.

As part of the legal requirement to comply with international trade controls, we require all candidates to successfully complete a Baseline Personnel Security Standard (BPSS) check including criminal record checks. In addition we will check the identity of all employees against various government denied party lists prior to making a formal offer of employment.
