

# Collins Aerospace

## **Maintenance Technician - Banbury**

Collins Aerospace is a leader in technologically advanced and intelligent solutions for the global aerospace and defence industry. Created in 2018 by bringing together Rockwell Collins and UTC Aerospace Systems, Collins Aerospace has the capabilities, comprehensive portfolio and expertise to solve customers' toughest challenges and to meet the demands of a rapidly evolving global market.

The high quality products we design, test and produce in our Mechanical Systems help millions of passengers reach their destinations safely – every day! From landing systems and actuation to propellers, flight controls and hoist and winch – the products we manufacture work together behind the scenes to enhance the overall flight experience. We delight our customers with superior products and best-in-class service. Our global team is committed to continuous improvement – we work hard to make our solutions lighter-weight, stronger and more technically advanced, so that plane travel can be safer, more affordable and more sustainable in the years to come. We are looking for the best and brightest to fly and land with us!

Collins Aerospace makes modern flight possible. Of course, that wouldn't be possible without the capabilities and technologies of our organization, as well as our engineers – a highly skilled, accomplished network that spans more than 180 sites, 24 countries and 6 Strategic Business Units (SBUs).

Our industry-leading experts are setting the standards for the aerospace industry and paving the way for the future. But as new challenges present themselves, we need fresh, creative and motivated minds to overcome these hurdles, help us break barriers and achieve new levels of innovation. Do you have what it takes to join a global, diverse organization that doesn't shy away from big opportunities? If so, we invite you to join our ranks and create the next generation of aerospace technologies.

Together, we will nurture an engineering culture that values intellectual curiosity, risk takers and integrity. A place where we will challenge ourselves, our teams, and the status quo and where we will work to find a way – the right way – to achieve what others can only dream of.

### **In this role you will:**

- Service and maintain the existing plant equipment and building facilities
- New equipment installation and modification
- Safety system installations and improvements
- Calibration of various equipment and machinery
- Movement or re-organisation of production lines
- Installation of services to support new equipment or processes
- Assist with implementation of changes to manufacturing processes
- Any other activities requiring practical engineering support in their implementation

- Produce work instructions for specific job tasks
- Complete work orders for all works undertaken
- Work with machine controls (PLC etc.), pneumatic or hydraulic systems

**You will bring to this role:**

- The ability and the capacity to understand a wide range of engineering functions and procedures for the relevant technology
- The ability to work co-operatively and liaise with people at all levels
- Good technical engineering skills and good practical skills, with a common sense approach
- Self-confidence and ability to work independently and have good team working skills
- Excellent communication skills
- Able to demonstrate strong independent working skills across Mechanical and Electrical disciplines
- Problem solving techniques and ability to work on own initiative. (Logical and systematic approach)
- Experience working in a similar role, possibly from a maintenance or engineering technician background
- The ability to prioritise breakdowns to reduce downtime throughout the factory
- A fast paced and enthusiastic and confident work ethic, whilst maintaining composure under pressure
- Ideally, apprentice trained to City & Guilds level or above
- PC Literate
- Electrical training against 17th edition or above
- The desire and motivation to improve the department and facility

As part of the legal requirement to comply with international trade controls, we require all candidates to successfully complete a Baseline Personnel Security Standard (BPSS) check including criminal record checks. In addition we will check the identity of all employees against various government denied party lists prior to making a formal offer of employment.
