

# Collins Aerospace

## **Programme Manager - Banbury**

Collins Aerospace is a leader in technologically advanced and intelligent solutions for the global aerospace and defence industry. Created in 2018 by bringing together Rockwell Collins and UTC Aerospace Systems, Collins Aerospace has the capabilities, comprehensive portfolio and expertise to solve customers' toughest challenges and to meet the demands of a rapidly evolving global market.

The high quality products we design, test and produce in our Mechanical Systems help millions of passengers reach their destinations safely – every day! From landing systems and actuation to propellers, flight controls and hoist and winch – the products we manufacture work together behind the scenes to enhance the overall flight experience. We delight our customers with superior products and best-in-class service. Our global team is committed to continuous improvement – we work hard to make our solutions lighter-weight, stronger and more technically advanced, so that plane travel can be safer, more affordable and more sustainable in the years to come. We are looking for the best and brightest to fly and land with us!

Collins Aerospace makes modern flight possible. Of course, that wouldn't be possible without the capabilities and technologies of our organization, as well as our engineers – a highly skilled, accomplished network that spans more than 180 sites, 24 countries and 6 Strategic Business Units (SBUs).

Our industry-leading experts are setting the standards for the aerospace industry and paving the way for the future. But as new challenges present themselves, we need fresh, creative and motivated minds to overcome these hurdles, help us break barriers and achieve new levels of innovation. Do you have what it takes to join a global, diverse organization that doesn't shy away from big opportunities? If so, we invite you to join our ranks and create the next generation of aerospace technologies.

Together, we will nurture an engineering culture that values intellectual curiosity, risk takers and integrity. A place where we will challenge ourselves, our teams, and the status quo and where we will work to find a way – the right way – to achieve what others can only dream of.

### **As a Programme Manager you will:**

Need to be an experienced, high achieving individual who can take responsibility for leading a team of people to achieve business and customer deliverables associated with the Development, Qualification, Demonstration and Initial Production phases of a project within our Aerospace Value Stream.

### **In this role you will:**

- Lead a multi-disciplined group of people to achieve contracted and targeted project objectives on time and in full (OTIF)
- Lead cost reduction programmes
- Create, maintain and effectively communicating project plans and resource profiles
- Create and manage project cash flows, budgets, forecasts and earned value analyses
- Identify and implement cost reduction and other financial enhancement initiatives
- Change management co-ordination & tracking to enable cost recovery from customer
- Support approval for, proposing and negotiating contract change amendments
- Support customer satisfaction surveys against agreed and structured success criteria
- Support Project Status Reviews to Customer and UTC Senior Management
- Negotiate and acquiring the necessary resources to achieve project deliverables
- Ensure compliance to the UTC New Product Introduction (NPI) process and Customer Contract/Statement of work
- Ensure Key Project Indicators are tracked, maintained and reported on a regular basis
- Identify and implementing continuous improvement ideas and methodology

**You will bring to the role:**

- Good organisational and analytical ability including competence with general IT tools (ie MS Office)
- Demonstrable track record of high performance standards used to deliver committed objectives
- Abundant leadership and communication skills
- Strong financial awareness
- Passionate desire to excel against demanding customer expectations
- Ability to think creatively and wisely apply your influential personality
- A passion to take ownership and deliver as both leader and member in a winning and supportive team environment
- Experience or enjoyment of working within a complex business situation
- Willing to travel and to work flexible hours to support communication across different time zones
- An engineering background preferably with experience in development of aircraft actuation systems
- Knowledge of project management IT tools (MS Project) and earned value techniques would be an advantage
- Chartered Programme Manager

As part of the legal requirement to comply with international trade controls, we require all candidates to successfully complete a Baseline Personnel Security Standard (BPSS) check including criminal record checks. In addition we will check the identity of all employees against various government denied party lists prior to making a formal offer of employment.
